

CASSANDRA DAVIDSON

North Easton, MA | 508-261-5644 | cassied1028@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Early-career Software Engineer with experience in QA automation, Selenium testing, and full-stack web development using Java and Python. Former collegiate athlete bringing strong discipline, accountability, and communication skills to collaborative technical teams.

SKILLS & TOOLS

Programming: Java, Python, C++, JavaScript

Frameworks & Tools: FastAPI, Puppeteer, React Native, Git

Testing: Selenium WebDriver, TestNG, JUnit

Databases: SQL, MariaDB

PROJECTS

eBay Sold Listings Analyzer

03/2026 – 04/2026

Technologies: Python, FastAPI, Puppeteer, JavaScript

- Built a full-stack web application using FastAPI and Puppeteer to analyze eBay sold listings and extract real-time pricing data.
- Implemented a web scraper for sold and active listings, calculating metrics such as average price and sell-through rate.
- Designed backend API endpoints to process and transform raw listing data into meaningful insights for resale decision-making.

Physical Pomodoro Clock

03/2026 – 04/2026

Technologies: C++, ESP32, Embedded Systems

- Designed and built a physical Pomodoro clock using an ESP32 microcontroller, e-paper display, and various other components.
- Developed a custom C++ UI system with state management, timer logic, and hardware input handling for an interactive user experience.
- Documented the development process through a multi-part YouTube series focused on learning electronics from scratch.

EXPERIENCE

Development Intern, ConnectPay Payroll Services

06/2024 – 08/2024

Built and maintained testing infrastructure to improve software reliability and support continuous delivery of a production web application.

- Developed automated regression tests using Selenium WebDriver to validate application workflows.
- Integrated automated tests into an Azure DevOps CI pipeline, enabling consistent regression testing for a new software.
- Collaborated with developers to identify and resolve software defects, independently managing test execution and communicating issues across the development team.

Computer Science Research, Skidmore College

05/2023 – 08/2023

Conducted applied computer science research focused on digital safety, combining software development with user-centered educational design.

- Completed 10-week collaborative research on children's understanding of online safety.
- Designed and developed a social media application using React Native, HTML, and JavaScript to foster safe online interactions and educate children about privacy.
- Delivered a poster presentation at the Skidmore summer faculty-student research symposium, showcasing a demo of the app and contributed to discussions on enhancing digital safety for children.

Peer Academic Coach Captain, Skidmore College

09/2022 – 05/2025

- Mentored students to build independence and confidence in core computer science concepts through structured, one-on-one academic coaching.
- Participated in specialized training to enhance tutoring methods and provide constructive, growth-oriented feedback.

EDUCATION

Skidmore College, Saratoga Springs, NY

09/2021 - 05/2025

Bachelor of Arts in Computer Science, Biology Minor

- Magna Cum Laude & Dean's List
- NCAA Women's Basketball – League Champions
- Academic All-District Team – recognized as one of the nation's top student-athletes
